Virtual Machine Account
USER user
PW   password

CHECK Virtual Machine assigned ip address (also check interface bridge of virtual machine before start if you use wireless or eth adapter on your pc)

Access VM: ssh user@10.137.1.72 (VM IP)

Folder with container docker image
sudo -i
cd /root/docker

All container starts automatically when VM starts

Set your PC file hosts (with ip address of virtual machine)
10.137.1.72   ipa.example.test   ckan   metabase   supersetd

Accesso Docker from your PC:
https://ipa.example.test
